

REGION 2 NOTIFIABLE CONDITIONS SURVEILLANCE REPORT

November 2021

Note: This report includes total case numbers of confirmed, probable and suspect disease. A variety of unique factors may cause some diseases to be under-reported and should be considered when using comparisons to previous years.

In Washington State, there are more than 80 conditions which health care providers must, by law, report to local public health.* Table 1 presents the case counts of conditions for which Clallam, Jefferson, or Kitsap counties had at least one case reported in the current year to date (YTD) or previous year by this time last year. The case count so far this year for each county is compared to the case count by this month last year (YTD). A 5-year annual average number of cases provides a baseline of expected cases for an entire year; the 5-year average helps "smooth out" any variation over time. Notifiable conditions not listed in Table 1 are those for which no cases were reported for any of the counties during the past 2 years. Table 2 includes rates for a sub-set of high volume conditions. In this table, the YTD rates (number of cases reported YTD divided by the annual population estimate[^]) are shown for both the current year and last year. A 5-year average annual rate (average of rates for the previous 5 years) provides the expected rate for a complete year.

Note: Data are preliminary and will change. Additional cases can be reported at any time.

* A complete list of Notifiable Conditions (per WAC 246-101) is available at: <https://www.doh.wa.gov/ForPublicHealthandHealthcareProviders/NotifiableConditions/ListofNotifiableConditions>

HIV/AIDS: Includes new diagnoses, previously diagnosed cases who have newly moved to the state, and babies born to HIV+ mothers.

[^] County population estimates are from the Washington Office of Financial Management. When the estimate for the current year is not available, the estimate from the previous year is used.

County	2021	2020
Clallam	77,550	76,770
Jefferson	34,450	32,190
Kitsap	275,600	272,200
