

Kitsap Respiratory Illness Report

Week 52 (12/25/2022 - 12/31/2022)

Summary: Local influenza activity is currently **high**, with 113 positive influenza tests in the past week (1,610 cumulative (24.5% of total tested) since 10/2/2022). RSV activity is currently **elevated**, with 22 positive RSV tests in the past week (436 since the start of the season). In the past week 4.2% of emergency department (ED) visits were related to influenza-like illness (ILI). In the 2022-2023 flu season, there has been 1 influenza-related death and 3 outbreaks in long-term care facilities.

NOTE: Weeks 40 and 41 of the 2022-23 flu season are suppressed for two of the figures due to a temporary disruption in data reporting.
